

NRC#1143930/Bayou Teche/PSC

Wood Duck Box Survey (conducted on 3/31/2016)

LDWF Response personnel checked the 18 wood duck boxes that are located within the impact area. Out of the 18 boxes that we checked only 4 of those boxes showed signs of nesting activity (coordinates provided below). In accordance with UC discussions all wood duck boxes that showed signs of nesting activity were marked by LDWF with yellow caution tape. Shoreline clean-up teams should use caution when conducting operations near the boxes that we have marked. As we discussed this morning field teams should notify LDWF (Laura Carver #337-519-1754), whenever shoreline clean-up operations are started in those areas.

#### Locations of Marked Wood Duck Boxes
